

ALBERTO MORALES

Miami, FL | 713-907-3188 | almoralesbow@gmail.com | <http://amorales.netlify.app>

Objective

- Enthusiastic, dedicated, Software Developer with experience in analysis, design, development and deployment of web applications using Microsoft technologies (.NET, C#, ASP.NET - Web Services, MVC and SQL) in the Healthcare, Wellness and Financial Industry.

Education

- Universidad Dr. Rafael Belloso Chacin | Bachelor of Science in Electronic Engineering
- Coder Foundry | Full Stack Software Developer | .NET, C#, SQL, MVC.

Portfolio

<https://amorales.netlify.app/>

Certifications

HIPAA

Skills & Abilities

- Experience in Systems Analysis, Design, Development and Implementation of various applications including Web and Client/Server Application development using Microsoft .NET Framework, C#.NET, ASP.NET, Web Forms, MVC.
- Programming experience with web technologies like HTML, CSS, JavaScript, LINQ.
- Experience in building client/server, database, web design and/or Internet based systems using Visual Studio .NET.
- Involved in Design, Development and Testing of Web Forms and Web Services using IIS, ASP.NET, and .NET Framework.
- Experience with SQL Server Management Studio, T-SQL, design of SQL Views and SQL Stored Procedures as well as T-SQL job scheduling, SSIS and SSRS Development.
- ETL processes: Experience designing and developing efficient processes for data ingestion, integration, and analytics.

Professional Experience

Insight Global | Clinical Informatics Developer | Davie, FL | Hybrid
Aug 2024 - Present

- Analyze, design, configure, and test clinical software to drive business outcomes.
- Development of SQL and Oracle scripts for Clinical encounter lockouts and for Crystal Reports.
- Participate in problem analysis and preparation of programming specifications, including flow charts.
- Participate in root cause analysis investigations for clinical technical issue resolution, including diagnosis of problems, recommendations for corrective action, and implementation of resolutions.

- Collaborate with outside organizations, clinical leadership, clinical information analyst, and clinical trainers for process improvement initiatives within the clinical systems.
- Collaborate with the clinical team in the design, development, and management of clinical systems and applications, upgrades, integrations, documenting project schedules, implementation timelines, training, template development, and go-live plans, etc.
- Interact with users through various phases of design, implementation, testing, resolving, and maintenance of clinical systems and applications.
- Maintain the strictest confidentiality in accordance with policies, federal laws, and regulations.

inHealth Strategies | Software Engineer | La Palma, CA | Remote
Dec 2022 – July 2024

- Development of Web Portals (C# ASP.NET / SQL) with a user base of more than 100k users.
- Develop C# automated jobs (console apps) to send daily notification emails and to complete other maintenance tasks.
- T-SQL Development of database objects (stored procedures, views, tables, complex queries, user access, etc.) for application or for reporting needs.
- Development of ad-hoc SQL scripts to generate custom reports and statistical information as requested by customers.
- Development of efficient ETL processes for data ingestion, integration, and analytics.
- Development of back-end class libraries logic in C# to be reused in different areas of a web portal.
- Manage Azure resources: App Services, Databases, Blob storage, Webjobs, etc.
- Conduct periodically security and performance reviews on the Microsoft Azure Platform.
- Coordinate and execute with other team members deployment of production and test applications.

Black Knight Inc | Application Programmer | Jacksonville, FL | Remote
Feb 2022 – Dec -2022

- Analyze development of projects involving application development, migrations, and enhancements to existing applications.
- Participate in project meetings with other technical staff, business owners and subject matter experts.
- Assess and develop design requirements for project and communicate in writing or in meetings with development team while assessing detailed specifications against design requirements.
- Review applications in progress of development to ensure compliance with overall design parameters and corporate development standards.
- Develop and/or review development of test protocols for testing applications before user acceptance.
- Review test results and directs further development.
